Dash

The Flexible, Intuitive, Subscription-Based Solution Built to Manage All Aspects of Your Facility

From the creators of MediaPulse and powered by Microsoft Azure, Dash is a cloud based scheduling software tailored specifically for media facilities like yours. The flexible, intuitive solution built to manage all aspects of your facility. Dash streamlines organizational efficiency and provides instant visibility into the management of their facility.

Ready with dashboards, graphs and charts, Dash manages scheduling, quoting, invoicing and reporting all in one easy-to-use system. The cloud-based platform is safe and secure, providing easy access on any browser with HTML5.

Dash is a monthly subscription platform with a flexible user count to expand or contract with your business. Dash is powered by Microsoft Azure for reliability and Xytech engineers will have you up and running quickly.

Dash Modules

System

Supports system-wide preferences and system maintenance functions for Contracts, user profiles and customer profiles.

Scheduling

The scheduling of people, equipment, sound stages, edit suites, trucks and anything else you need. Schedule resources in a variety of ways, the system dynamically checks for conflicts, ensuring the correct availability.

Job **Management**

Easily identify and manage critical path information, activities and dates. Flexible and easy enough to allow both high-level and detailed presentation of information.

Bidding

The complete, project-based bidding and budgeting system used by sales and production planning personnel to assemble any number of bids or budgets for a project or production.

Optional Module

MetaVault **Library**

Supports the management of digital and physical assets and content metadata with unlimited metadata profiles configured to all the media types you manage.

About **Xytech**

The world's best media companies have depended on Xytech to run their businesses. MediaPulse is the only end-to-end solution for the complete content lifecycle. It provides scheduling, automation, asset management, billing, and cost recovery for broadcasters, media services companies, and transmission facilities in a scalable platform-independent solution.
