

Sky

MediaPulse, anywhere, on any device, for all your facility's needs.

Take MediaPulse Anywhere

Sky is the web interface for MediaPulse. Not just a portal, MediaPulse Sky is a complete user experience reimagined for the web and mobile devices. The interface is completely configurable through our Layout Editor. Each screen and every user can have separate Client, Web and Mobile layouts.

Dashboards with Panels, Tabs and graphics all work together to give you a clean, easy and robust user experience. In addition to the full feature footprint of MediaPulse, Sky delivers real time reporting visualized through charts and graphs to web and mobile devices.

Sky is available as an addition to your on premises MediaPulse installation or through the MediaPulse Cloud.

Features and Benefits

- Supports Chrome, IE, Safari and Firefox
- Engineered for iOS and Android
- Real time KPI Dashboards are configurable for each user
- MediaPulse Security enables user to decide who sees what data
- Easily configured as a portal for clients to request services and access account information
- Includes specialty tools such as My Agenda, Transmission Arrival Board and Customized Dashboards.
