SCHEDUALL MIGRATION

THE MIGRATION PATH

Signed Contract → Discovery 1 → Configuration 2 → UAT/Training 3 → Go Live 4
From the time the contract is signed, migration customers can expect the following Implementation steps:

1. DISCOVERY

Completed by Professional Services (PS) team, this is the first stage of implementation. A statement of work (SOW) is issued, goals are established, and an implementation timeline is set. The PS team gathers necessary information to start the configuration and set up the platform.

2. CONFIGURATION

In step two of the implementation process, the pre-configured instance is turned on, and the ScheduALL values are loaded. Xytech's solution includes best-in-class layouts, roles and data-rich reporting capabilities. Any requests for changes or tweaks are implemented and theres is an opportunity to review necessary data prior to asset loading.

3. (UAT)/TRAINING

At the stage of User Acceptance Training (UAT)/ Training, the customer will run through workflows and confirm everything works to their specifications, while test cases are performed to ensure quality. Admin Users are trained on the platform.

4. GO LIVE

Platform goes into production, as Users Admin trains additional users on the platform, Professional Services is available to assist. Handover from Professional Services to day-to-day Customer and Support teams then occurs.

An average implementation timeline

1	7-14 DAYS	2	30-60 DAYS	3	7-21 DAYS	4	5 DAYS

After a customer goes live, future steps or needs may be discussed to accommodate application additions or Phase Two approaches.
