

About Xytech

Leading Provider of Resource Management Software Solutions for Today's Media and Broadcast Companies

For over 30 years, we have simplified the workflows of broadcasters, networks and media service companies with our resource management software. Our MediaPulse platform integrates resource, order and asset management into a single solution, with custom configuration options for each user and every task.

Xytech's has over 450 clients in 22 countries. Our clients are among the world's best Networks, Studios and Media Services Companies. Our Scalable solution allows us to manage user bases from five users to thousands.

MediaPulse optimizes the scheduling of all resources, delivers a holistic view of feeds on your network and manages complex media-based workflows. Designed with integration in mind, easily connected to your existing ecosystem.

We drive efficiencies for our clients by providing a scalable, flexible solution enabling our clients to more effectively manage and execute their end-to-end business workflows. The predicates to each of our actions are innovation, integrity and professionalism. Our clients' successes are our successes.
