Dash Modules

System

Supports system-wide preferences and system maintenance functions for Contracts, user profiles and customer profiles.

Scheduling

The scheduling of people, equipment, sound stages, edit suites, trucks and anything else you need. Schedule resources in a variety of ways, the system dynamically checks for conflicts, ensuring the correct availability.

Job Management

Easily identify and manage critical path information, activities and dates. Flexible and easy enough to allow both high-level and detailed presentation of information.

Optional Modules

Bidding

The complete, project-based bidding and budgeting system used by sales and production planning personnel to assemble any number of bids or budgets for a project or production.

MetaVault Library

Supports the management of digital and physical assets and content metadata with unlimited metadata profiles configured to all the media types you manage.

About Xytech

For 30 years, the world's best media companies have depended on Xytech to run their businesses. MediaPulse is the only end-to-end solution for the complete content lifecycle. It provides scheduling, automation, asset management, billing, and cost recovery for broadcasters, media services companies, and transmission facilities in a scalable platform-independent solution.
