

MediaPulse Managed Cloud

The Right Cloud for Your Resource Management Software

The MediaPulse Managed Cloud run on Microsoft Azure is safe, secure and reliable. Hosting MediaPulse with Azure creates an efficient platform for MediaPulse deployments, lowers costs and increase uptime.

There are three significant advantages in the MediaPulse managed Cloud. First, only Azure has the Microsoft managed SQL Server database. This database is developed exclusively for the cloud and is redundant and performant. Second, the experts at Xytech manage your MediaPulse. All platform updates, MediaPulse updates, backups and configuration implementations can be managed by Xytech. Third, the MediaPulse Managed Cloud is highly available with redundancy for all servers with load balancing for to increase performance.

Data Centers are available in the United States and Europe.

Benefits and Features

- Proactive database analytics
- Geo-Replication for High Availability
- Redundant Servers with load balancing
- Encrypted data transfer
- API integration capabilities for any cloud or on-premises system
- Complete product support for MediaPulse software
- Managed MediaPulse upgrades
- Vulnerability scans
- FedRAMP High Authorization
- Single Sign-On (SSO) and OpenID Connect authentication
- 24/7/365 support

Managed Services

Xytech's Managed Services provides tremendous cost savings for MediaPulse upgrades. Xytech manages the entire process including test databases, site-specific test cases and orientation to new features.

Azure automatically monitors your individual database instance and performance notifications are received and actioned by Xytech Engineers. These notifications include performance and configuration monitoring.

Standard

Standard Managed Services consist of platform updates, MediaPulse annual upgrades, service packs and backups. Xytech's engineering staff manages and modifies screen layouts to users a custom fit. Orientation sessions for new features keep you up to date on the latest MediaPulse functionality to ensure your facility is leveraging Xytech's incredible new features.

Plus

Plus Managed Services include all the Standard Managed Services adding user management, security management and the configuration of new custom fields as your business changes.

Premium

Premium Managed Services adds complete Applications Administration support to Standard and Plus Managed Services. A test database is provisioned for you and site-specific test cases are used for Quality Assurance, every time new versions and service packs are installed.

About Xytech

The world's best media companies have depended on Xytech to run their businesses. MediaPulse is the only end-to-end solution for the complete content lifecycle. It provides scheduling, automation, asset management, billing, and cost recovery for broadcasters, media services companies, and transmission facilities in a scalable platform-independent solution.
