

MediaPulse MetaVault

Securely Manage Digital and Physical Media Content in a Single Solution

The world's premiere studios, broadcasters and media organizations, utilize MediaPulse MetaVault to securely manage digital and physical content.

Supports the management of digital and physical content metadata with unlimited metadata profiles configured to all the media types you manage. MetaVault separates Title metadata records from asset metadata records, creating many-to-many relationships.

MetaVault provides a total content backbone for the creation and storage of files, proxies and metadata.

Benefits and Features

- Supports both digital and physical media
- Configurable data schema allows system expansion without the need for customization
- Supports multiple metadata profiles simultaneously
- Splitting metadata records from 'title to 'media asset' metadata
- Asset linking improves user's efficiency with the ability to associate titles to media assets.

MetaVault

Movement Tracking

MetaVault tracks the movement of physical and file-based media assets with complete audit trail.

Access Security

MetaVault ensures you have complete control over who can access asset information, restricting access based upon product and customer. Uses the concept of working or 'aka' titles for sensitive material.

Labeling

Supports barcode and RFID labelling for physical media to manage even the largest and most complex media libraries.

Vault Viewer

Graphical representation of aisles and shelves of physical media repositories, supports dedicated or floating media locations.

Picking/Put Away

MetaVault improves the efficiency of your vault operation by identifying the optimum routing of vault personnel picking or putting away media.

Integration

Adaptor architecture drives simple integration with on premise and cloud media repositories to deliver a federated view of all your media content.

Media Workflows

Tightly integrated with MediaPulse's media-based workflow, managing end-to-end content process workflows.

About Xytech

The world's best media companies have depended on Xytech to run their businesses. MediaPulse is the only end-to-end solution for the complete content lifecycle. It provides scheduling, automation, asset management, billing, and cost recovery for broadcasters, media services companies, and transmission facilities in a scalable platform-independent solution.
